

HF Alkylation Equipment is excited to expand its alkylation portfolio to include Durco plug valves for Sulfuric Acid Alkylation (H₂SO₄).

Partnering with your local or preferred Flowserve representative, HF Alkylation Equipment has available inventory and a supporting sales team with decades of experience to help solve your toughest problems specific to refinery processes.

Durco offers a wide range of plug valve models, materials, & configurations – providing flexibility to meet your unique application needs.

HF Alkylation Equipment will have inventories readily available in the following configurations:

- Durco G4B (Marathon Stem Seal) Model Plug Valve
- Alloy 20 body & trim materials – subject to your service application
- Fire tested in accordance with API 607
- Available in Threaded and Raised Face Flanged End Configurations
- Available in ASME 150 lbs and 300 lbs
- Sizes in ½” thru 12”

Please call us today to learn more about this exciting addition & our complete portfolio of alkylation offerings!
